

Deva Surprise Major

Figure 1 displays eight 58x18 grids, each representing a different path configuration for a 76-cell snake. The grids are labeled with circled numbers (2, 6, 4, 2, 3, 5, 7, 8) and a corresponding path number (1-8). The paths are color-coded: blue for the main path and red for the remaining cells. The grids are arranged in two rows of four. The top row contains grids 2, 6, 4, and 2. The bottom row contains grids 3, 5, 7, and 8. Each grid shows a unique path configuration for the 76-cell snake.
