

Tanzanite Surprise Major

Figure 1 displays eight 8x8 grids (labeled 2 through 8) illustrating the evolution of a 1D Ising spin chain. Each grid contains a sequence of 64 spins (1 or 2) and a set of red and blue lines representing the evolution of two types of excitations. The grids are arranged in a 4x2 grid, with the first column containing grids 2, 4, 6, 8 and the second column containing grids 3, 5, 7, 8. The grids are labeled with their respective grid numbers in the top right corner.
